Agenda

- **Compounding Pharmacy Market Overview**
- **Customer Journey Map**
- **Product Family Landscape**
- **Key Opportunities**

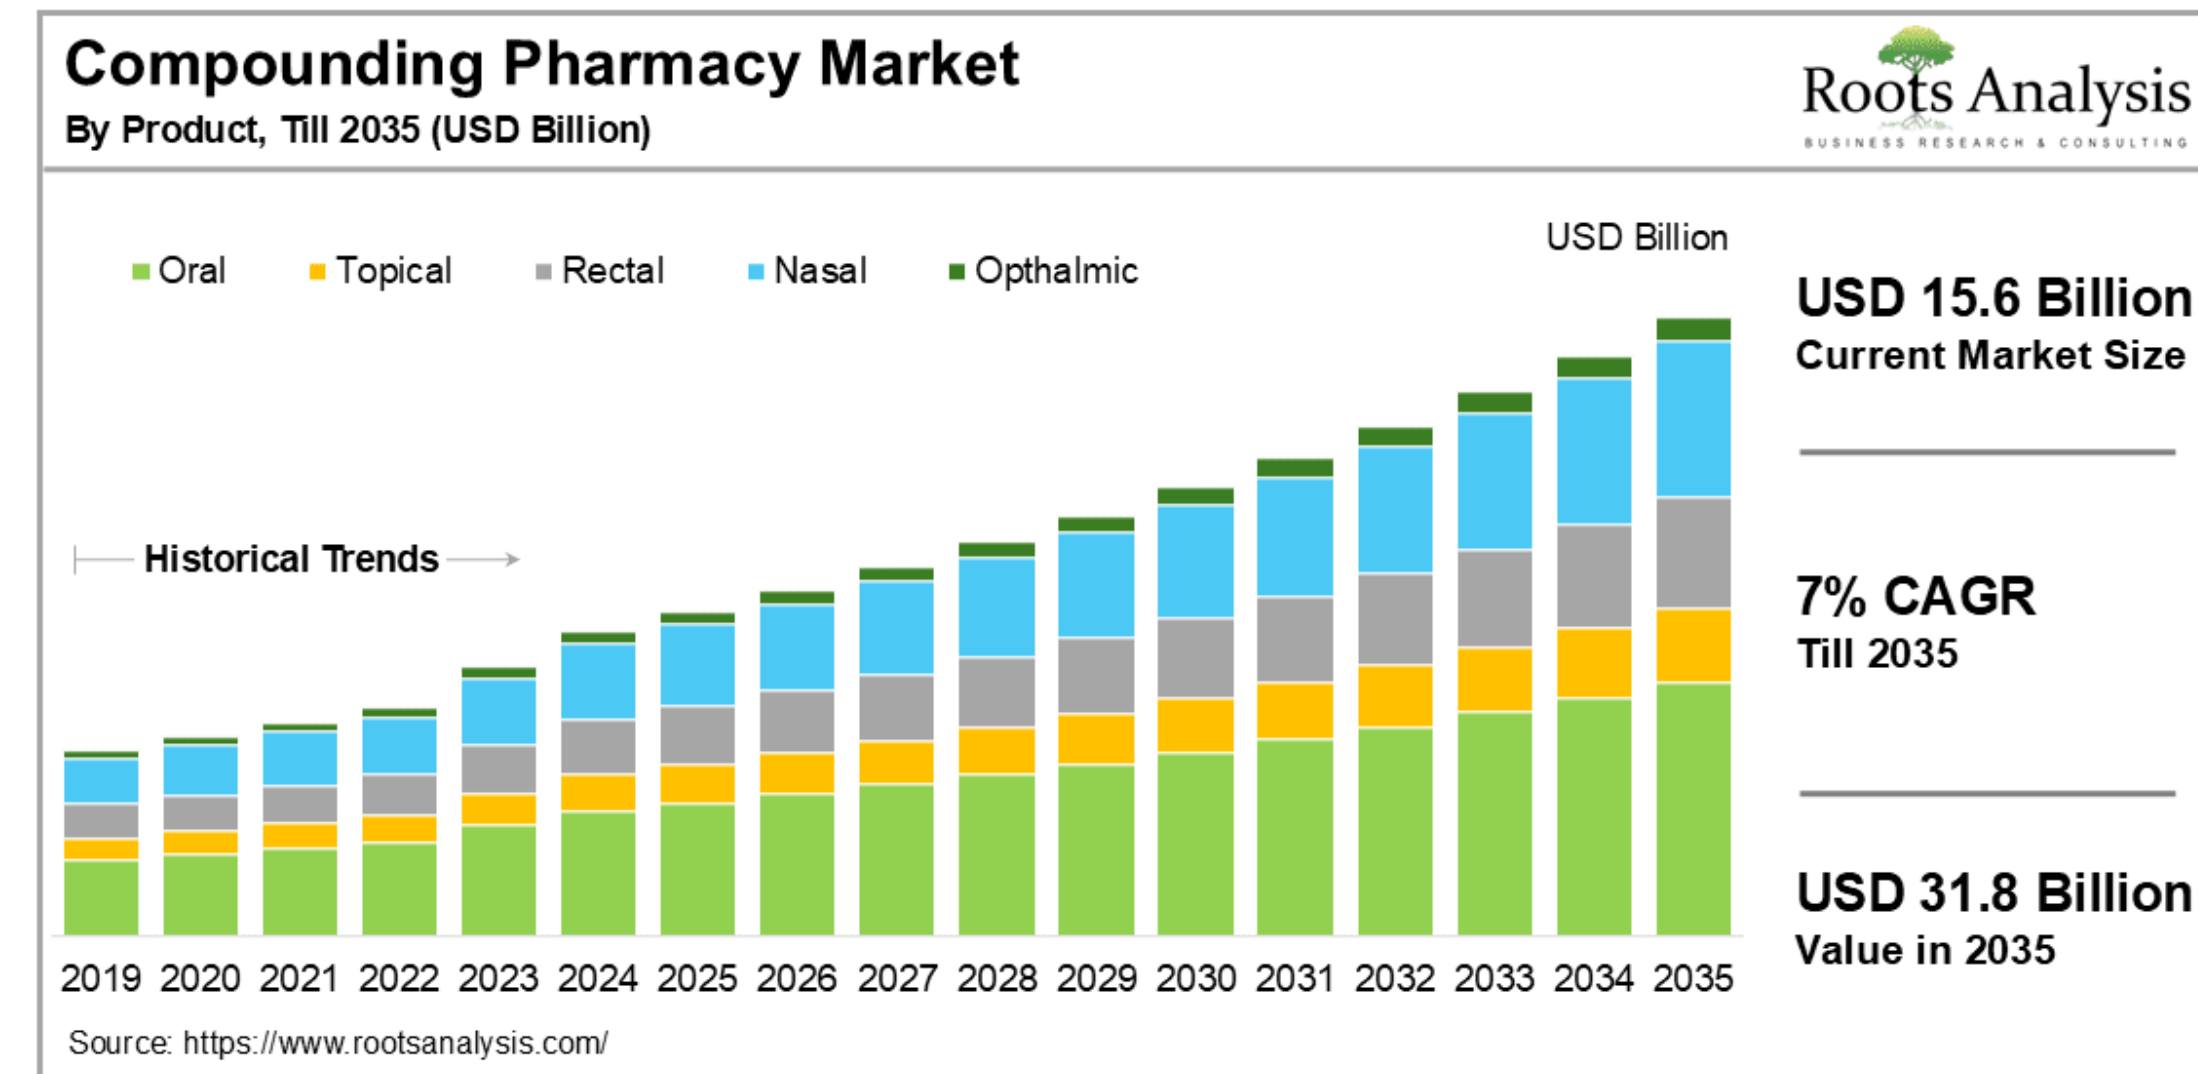

Compounding Pharmacy Market Overview

The U.S. Compounding pharmacy market reached **15.6 billion** in 2024. **(2025~2034 CAGR 7%)**

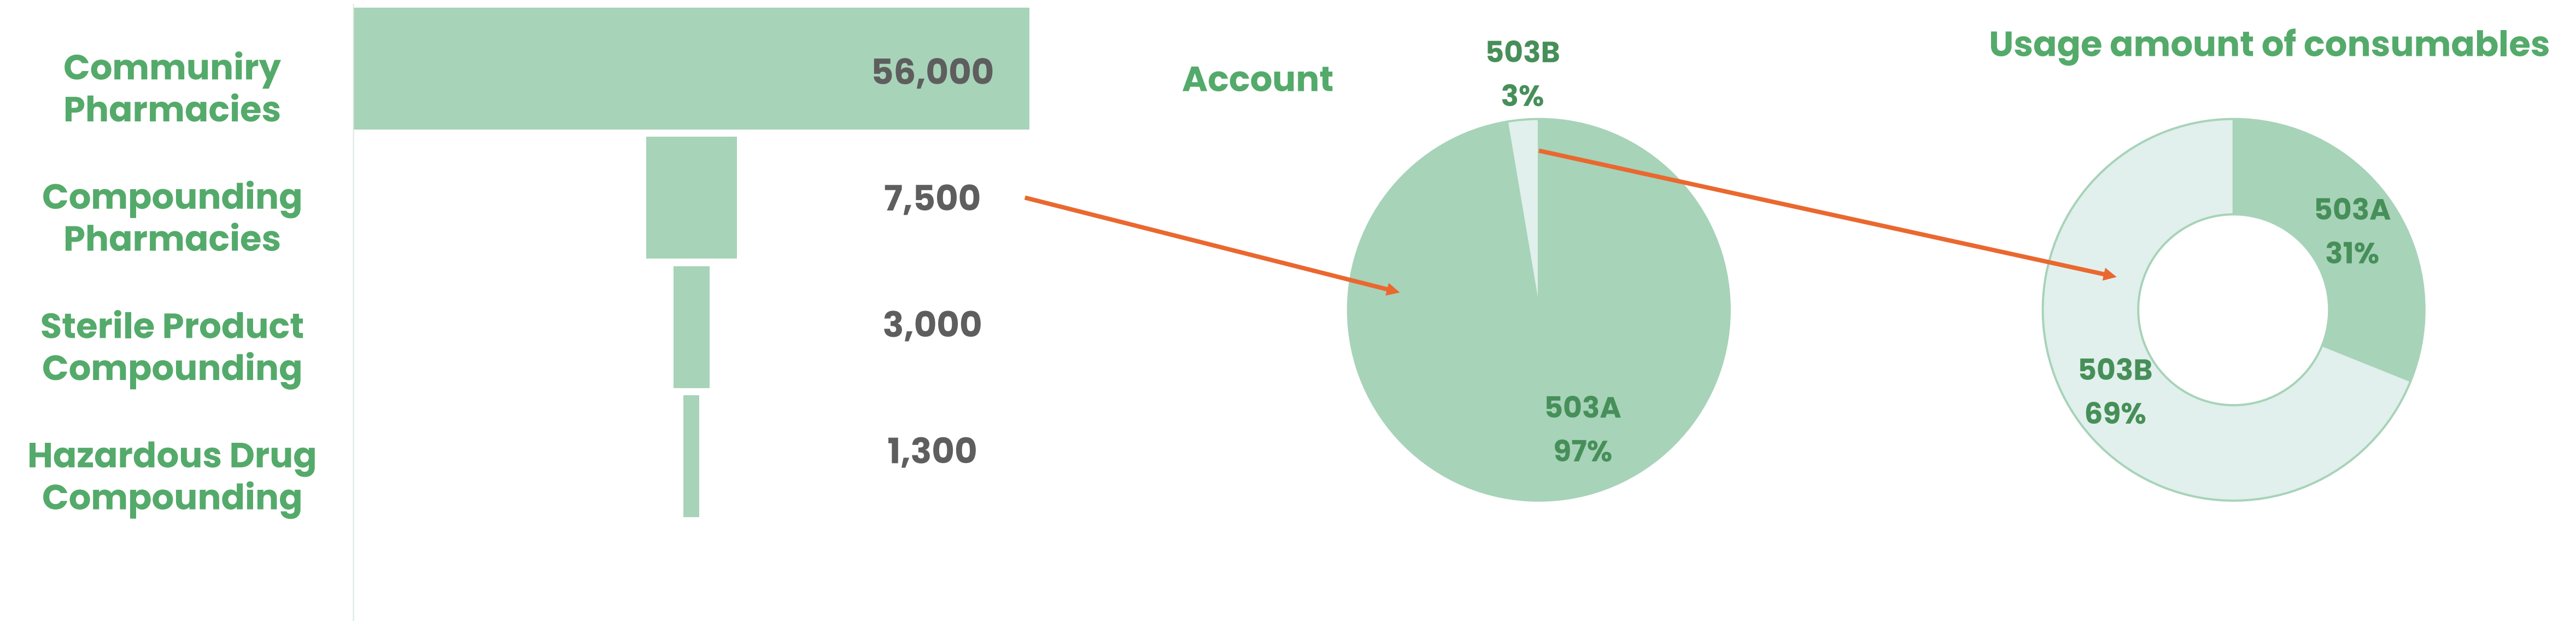

consumables account for **15–20%** of the total market, approximately **2.34–3.12 billion**

Key drivers:

- The problem of **drug shortages** continues to worsen, with 48 new drugs entering a shortage state in the first quarter of 2024;
- The demand for **personalized medicine** is growing, with 31% of prescriptions requiring dosage adjustments based on specific ages;
- The increase in the **aging population**, along with the strict enforcement of regulations such as USP <797/800>, has driven the demand for high-quality consumables.

Compounding Pharmacy Market Overview

Type	Operational Entity Characteristics	Major Client	Advantages	Challenges
503A	- Independent or chain community pharmacies - Prepare prescriptions for individual patients - Cannot engage in large-scale production - Regulated mainly by state pharmacy boards regarding the usage of consumables	- Individual patients - Small clinics - Nursing homes	- Large quantity - short decision-making chain (pharmacists handle purchasing)	Limited budget, reliance on McKesson/Cardinal distribution
503B (Outsourcing Facility)	- Operated in a corporate manner (such as QuVa, Fagron, Olympia) - Capable of mass production of sterile injectables - Can be sold directly to medical institutions without a prescription - Subject to direct FDA regulation (cGMP requirements)	- Hospital (accounting for 75%) - ASC (Outpatient Surgery Center) - Dialysis Center	- Large purchase volume - Willingness to pay a compliance premium (with a high tolerance for gross margin)	- The bidding period is long (6–12 months) - It requires FDA 510(k) approval + cGMP audit.

Value Chain of Compounding Pharmacy (Consumables)

Consumable Medical Devices Market Size: approximately \$ 1.46 – 1.94 billion

- Medical device giant
- Special materials

Upstream:
Quality, Stability,
FDA certification

- Carry out product research and production that meets various dispensing requirements;
- Consumables (such as disposable syringes, filters, protective gloves, infusion bags, biosafety cabinets, isolators)

- Large pharmaceutical distributors/GPO (75–80%)
- Specialized pharmacy suppliers (10–15%)
- Regional distributors (5–10%)
- E-commerce platforms (5–10%)

Midstream:
Distribution and
Compliance

- Provide a one-stop solution for the dispensary to ensure that the consumables comply with USP <797> and <800> standards;
- Offer USP compliance consultation and training services

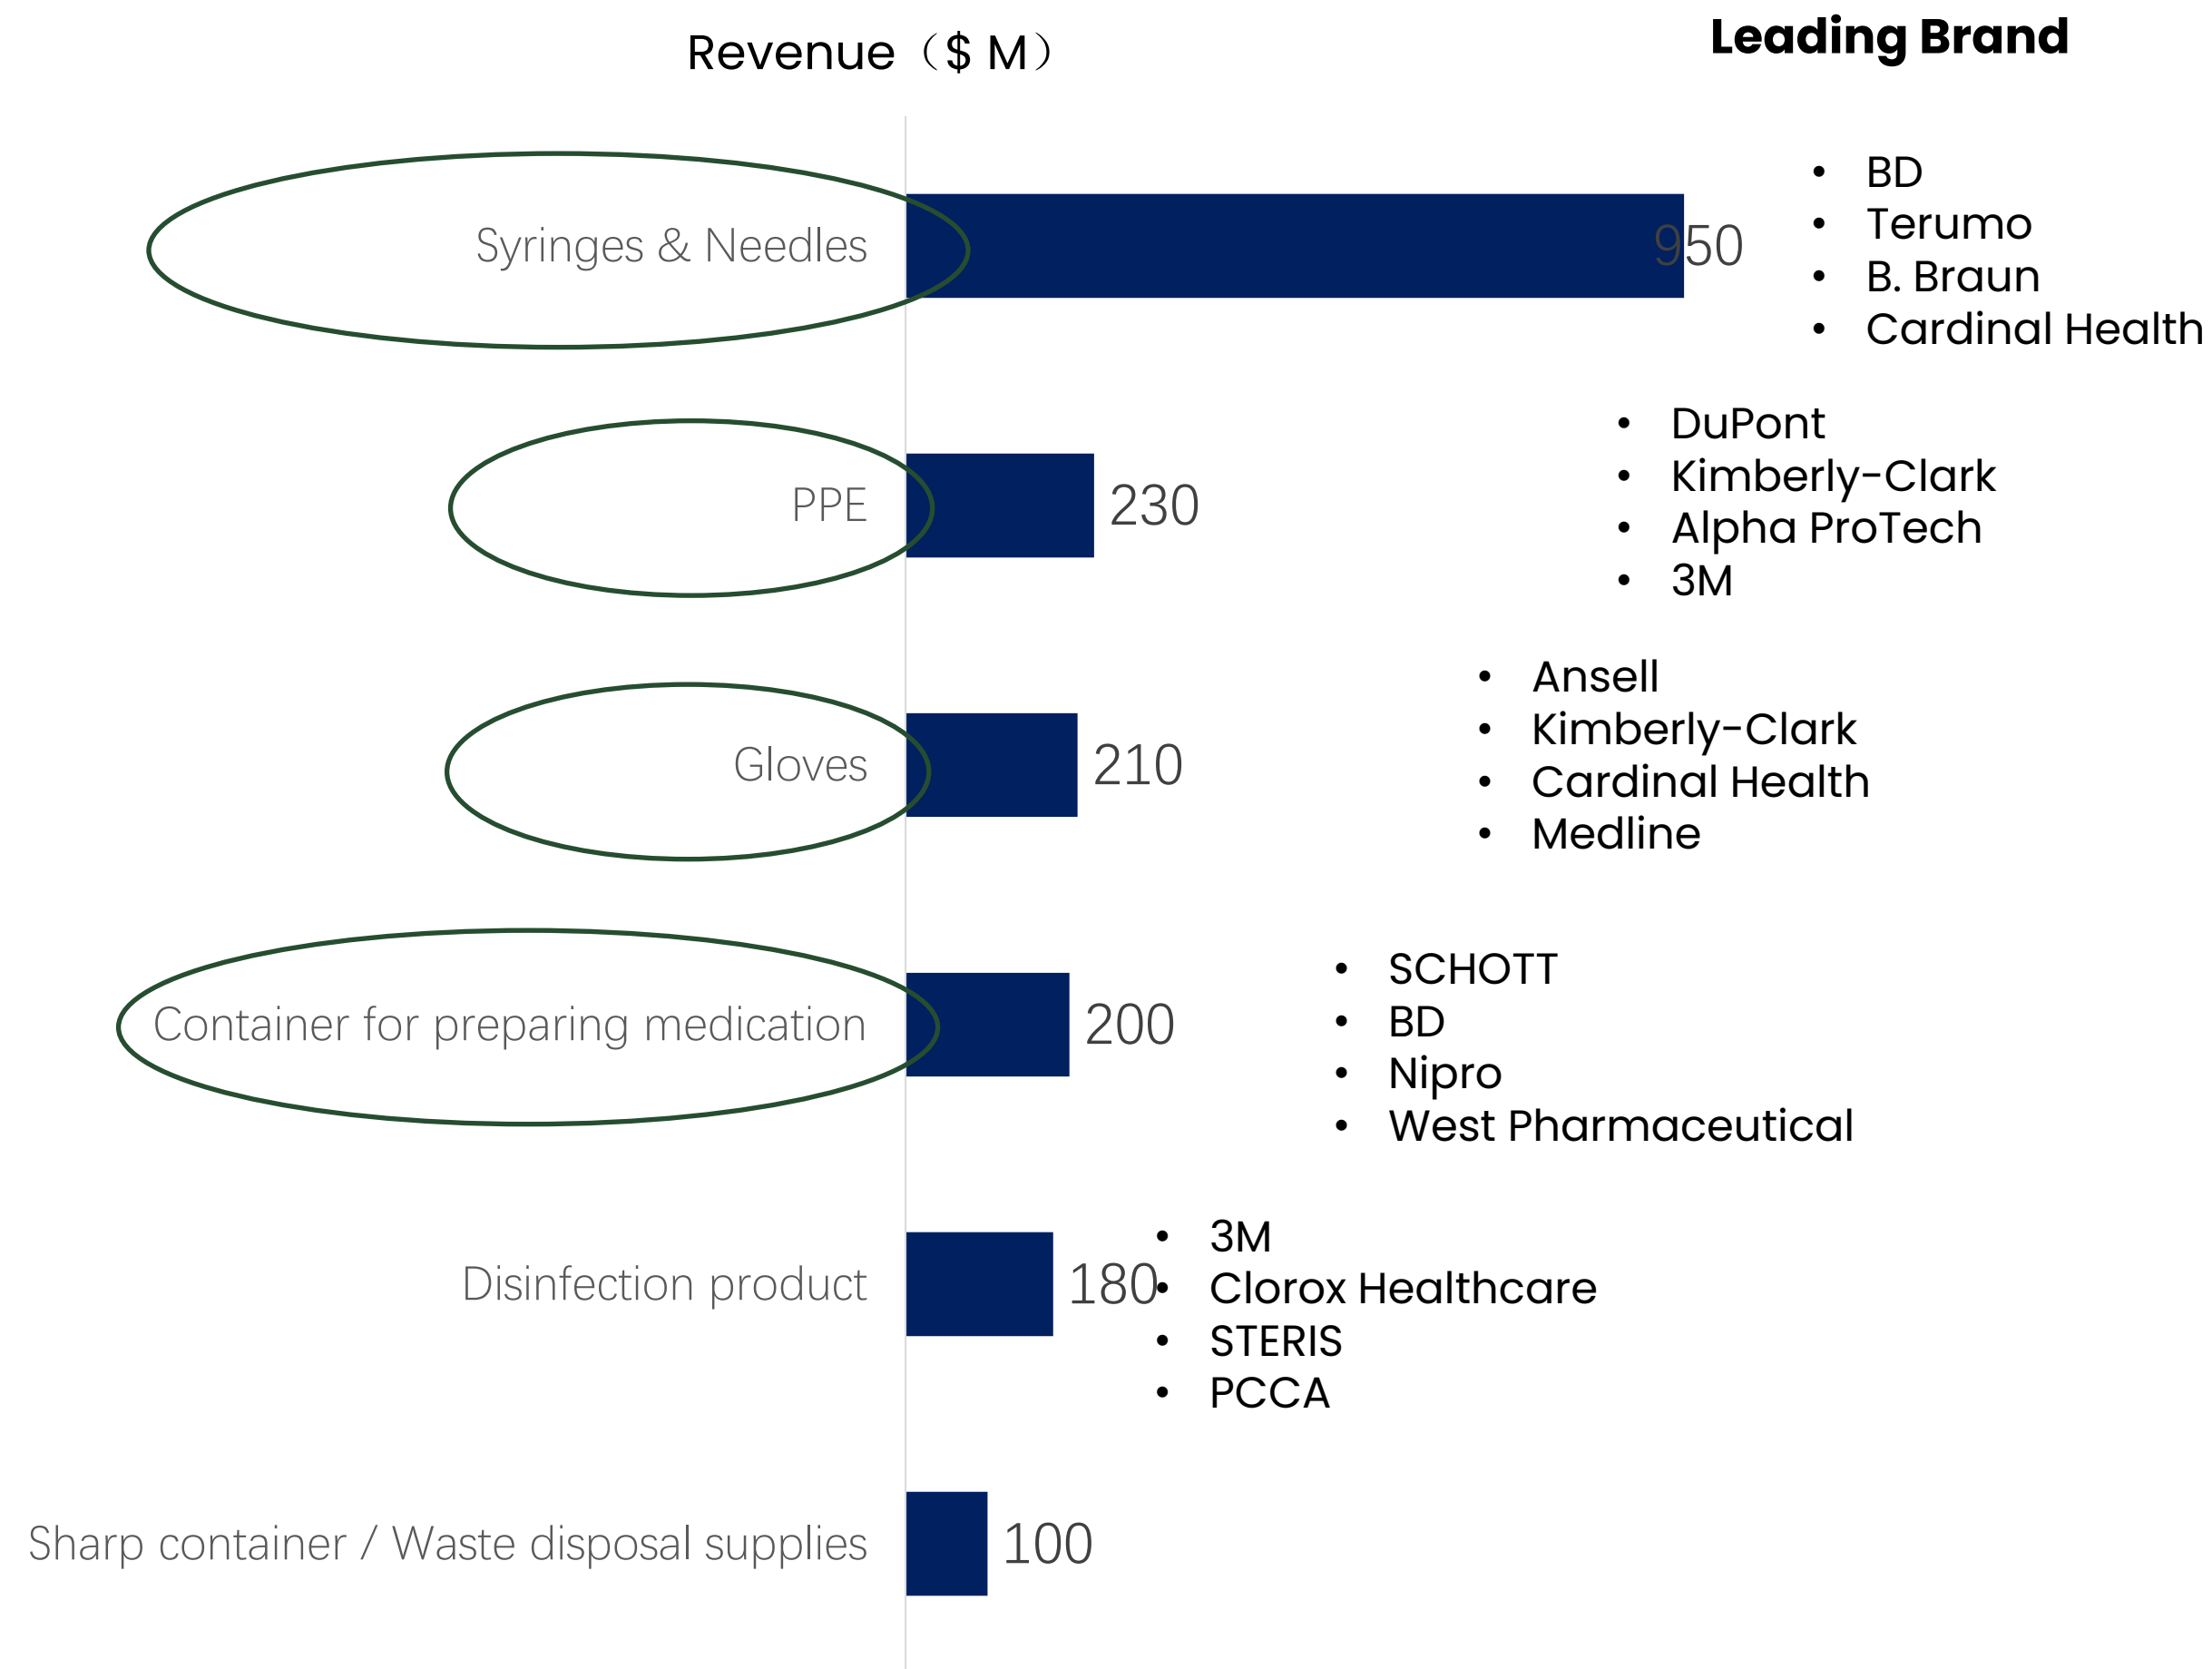

- Hospital-affiliated compound pharmacy (503A)
- Independent retail compound pharmacy (503A)
- Outsourced compound pharmacy (503B)

Downstream:
Precision medicine,
patient education

- When using consumables for sterile Compounding, it is necessary to ensure full traceability and compliance with cGMP standards.

Market Segment of Compounding Pharmacy

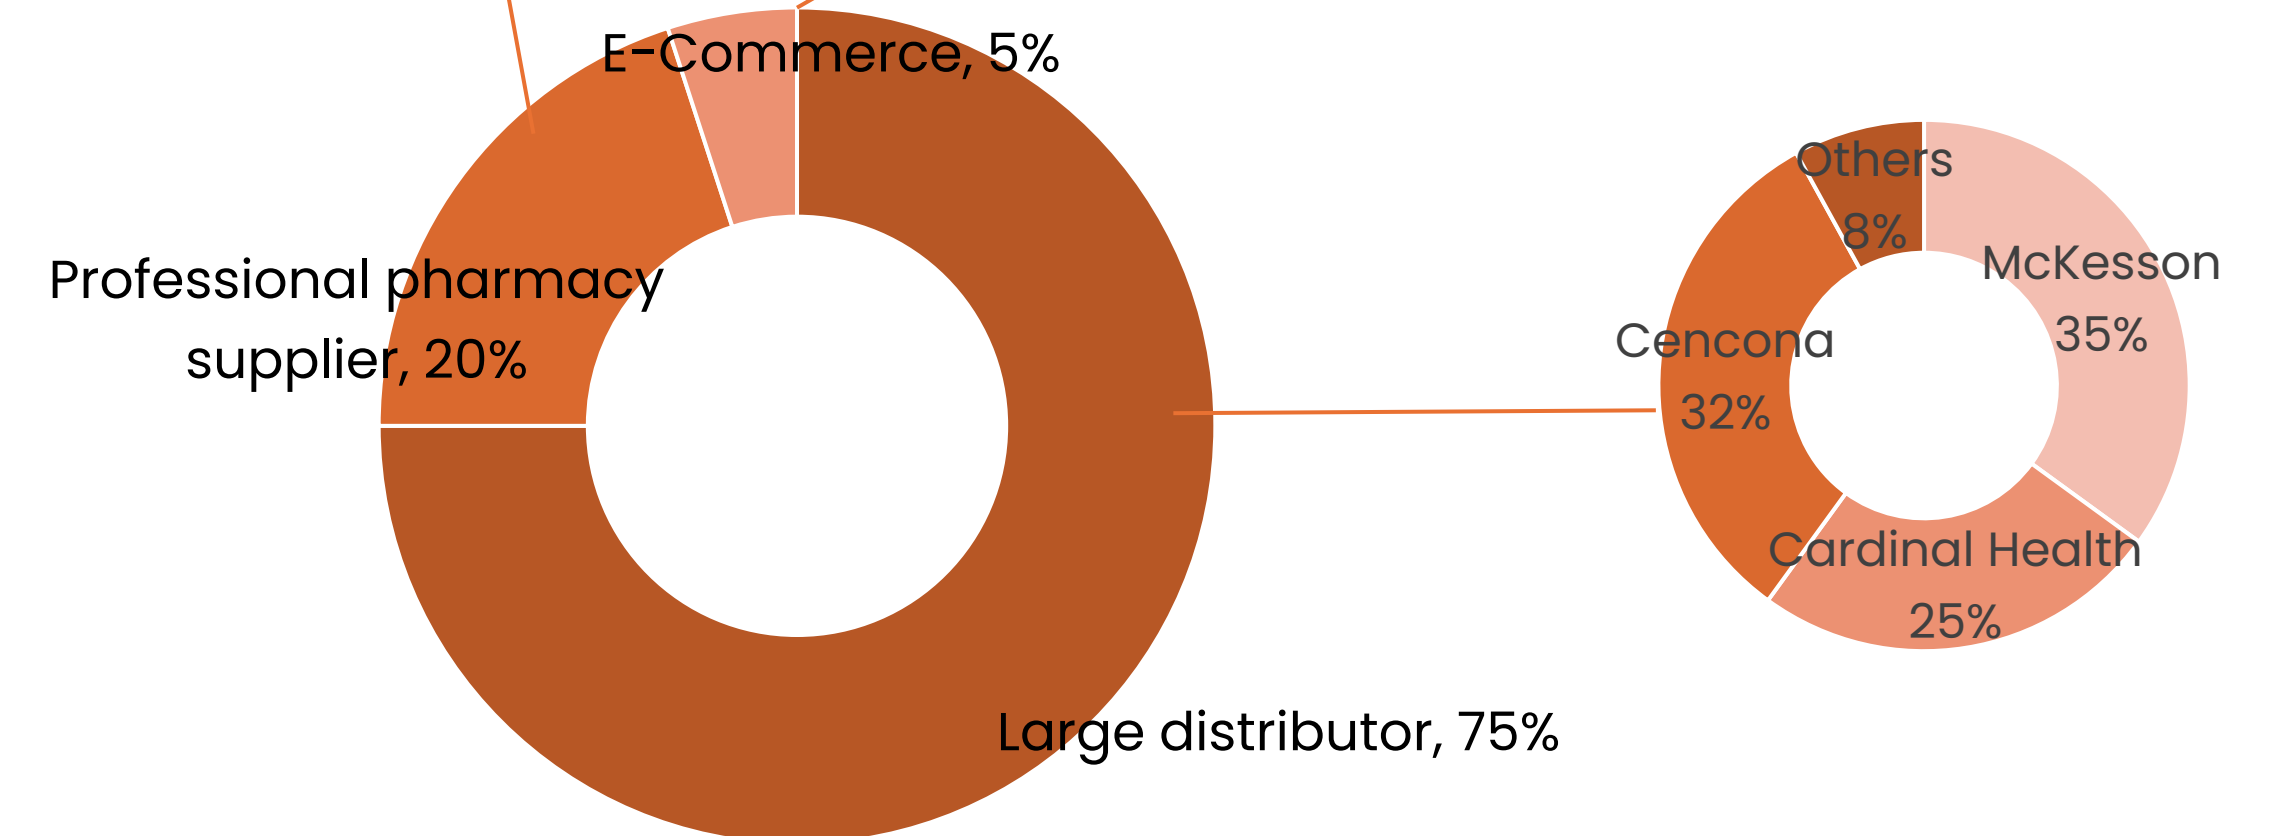

Professional pharmacy supplier

- PCCA
- Total Pharmacy Supply
- American Pharma Wholesale

E-Commerce

- Amazon Business
- VWR Avantor

Evaluation & Validation

Procurement Decision

Ongoing Partnership

 Concern/Mindset	"Did we use non-compliant consumables?" "Will the FDA conduct an audit and punish us next time?"	"Does McKesson have any new products that are compliant?" "Which one do the competitors use? Is it reliable?"	- Entering the procurement scope, addressing the issue of "Can't find you" "Is the report true?" - Can it pass the FDA audit?" "Will the trial affect the preparation efficiency?"	"Is this SKU included in the ERP system?" "Is it worth switching to a different supplier?"	"This audit didn't go wrong. Thanks to them!" "This can be recommended to our peers."
Key Actions	- Review FDA warning letters/USP updates - Hold internal QA meetings - List high-risk product categories (such as HD gloves, CSTD)	- Log in to McKesson.com and search for the keyword ("ASTM D6978 glove") - Consult on the PCCA for industry group - Compare the product with the compliance standards	Among the 7,300 compliant compounding pharmacies in the United States, 85.7% only purchase supplies from McKesson/Cardinal Health (PCCA 2024 survey).		- Quarterly repeat purchase - Sharing experiences at the PCCA annual meeting / state association - Recommending to other pharmacies
 Strategic Rationale	87% of the sourcing managers have greater trust in suppliers who proactively alert about risks; early intervention can seize the decision-making time.	85.7% of the pharmacies only purchase from McKesson/Cardinal; not in the list = does not exist	The sourcing manager must leave audit trails; complete and easily archived documents significantly enhance trust.	Even if the product is better, if the ERP system fails to recognize the SKU, the purchase will still fail.	An average satisfied sourcing manager brings about 3.2 new customers.
Sales Objective	Build professional trust and become a "compliance advisor" rather than a salesperson.	Enter the procurement scope and solve the problem of "Can't find you"	Reduce the cost and risk of verification, and accelerate the decision-making process for trials	Eliminate system and process obstacles to facilitate the first order.	Turn customers into brand advocates and achieve self-growth

Strategic Rationale

- 87% of the sourcing managers have greater trust in suppliers who proactively alert about risks; early intervention can seize the decision-making time.

- 85.7% of the pharmacies only purchase from McKesson/Cardinal;
- not in the list = does not exist

- The sourcing manager must leave audit trails; complete and easily archived documents significantly enhance trust.

- Even if the product is better, if the ERP system fails to recognize the SKU, the purchase will still fail.

- An average satisfied sourcing manager brings about 3.2 new customers.

- Build professional trust and become a "compliance advisor" rather than a salesperson.

- Enter the procurement scope and solve the problem of "Can't find you"

- Reduce the cost and risk of verification, and accelerate the decision-making process for trials

- Eliminate system and process obstacles to facilitate the first order.

- Turn customers into brand advocates and achieve self-growth

Scenarios and Products of Compounding Pharmacy

**Sterile Drugs
(45%)**

1. Low dead space syringe (1-10ml)
2. **Syringe Filter 0.22μm**
3. Sterile Gloves
4. **Sterile Gown ISO-5**
5. Surgical Mask
6. Alcohol swab/Prep pads

**Hazardous Drugs
(20%)**

1. Safety syringe (1-10ml)
2. Sterile chemotherapy gloves
3. **Sterile chemotherapy gown**
4. N95 Mask
5. CSTD(Closed system transfer device)

**Total Parenteral Nutrition
(10%)**

1. Large-volume syringe (50-60ml)
2. **Gown & Gloves**
3. **Non-DEHP infusion bag**
4. Multi-chamber medication bag
5. Nutrition mixer

**Ophthalmology Medication
(10%)**

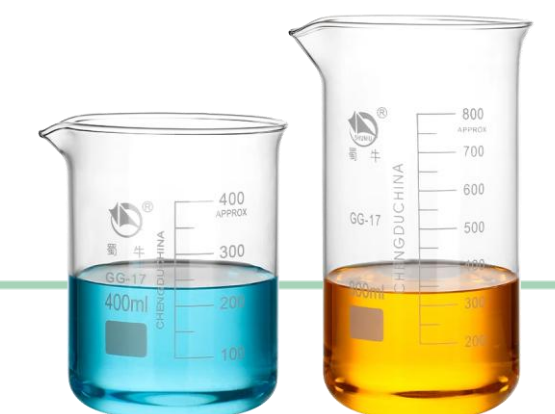

1. Fine needle tip(31-33G)
2. Micro syringe (0.3-1ml)
3. Eye drop bottle
4. Ointment tube
5. Gown & Gloves

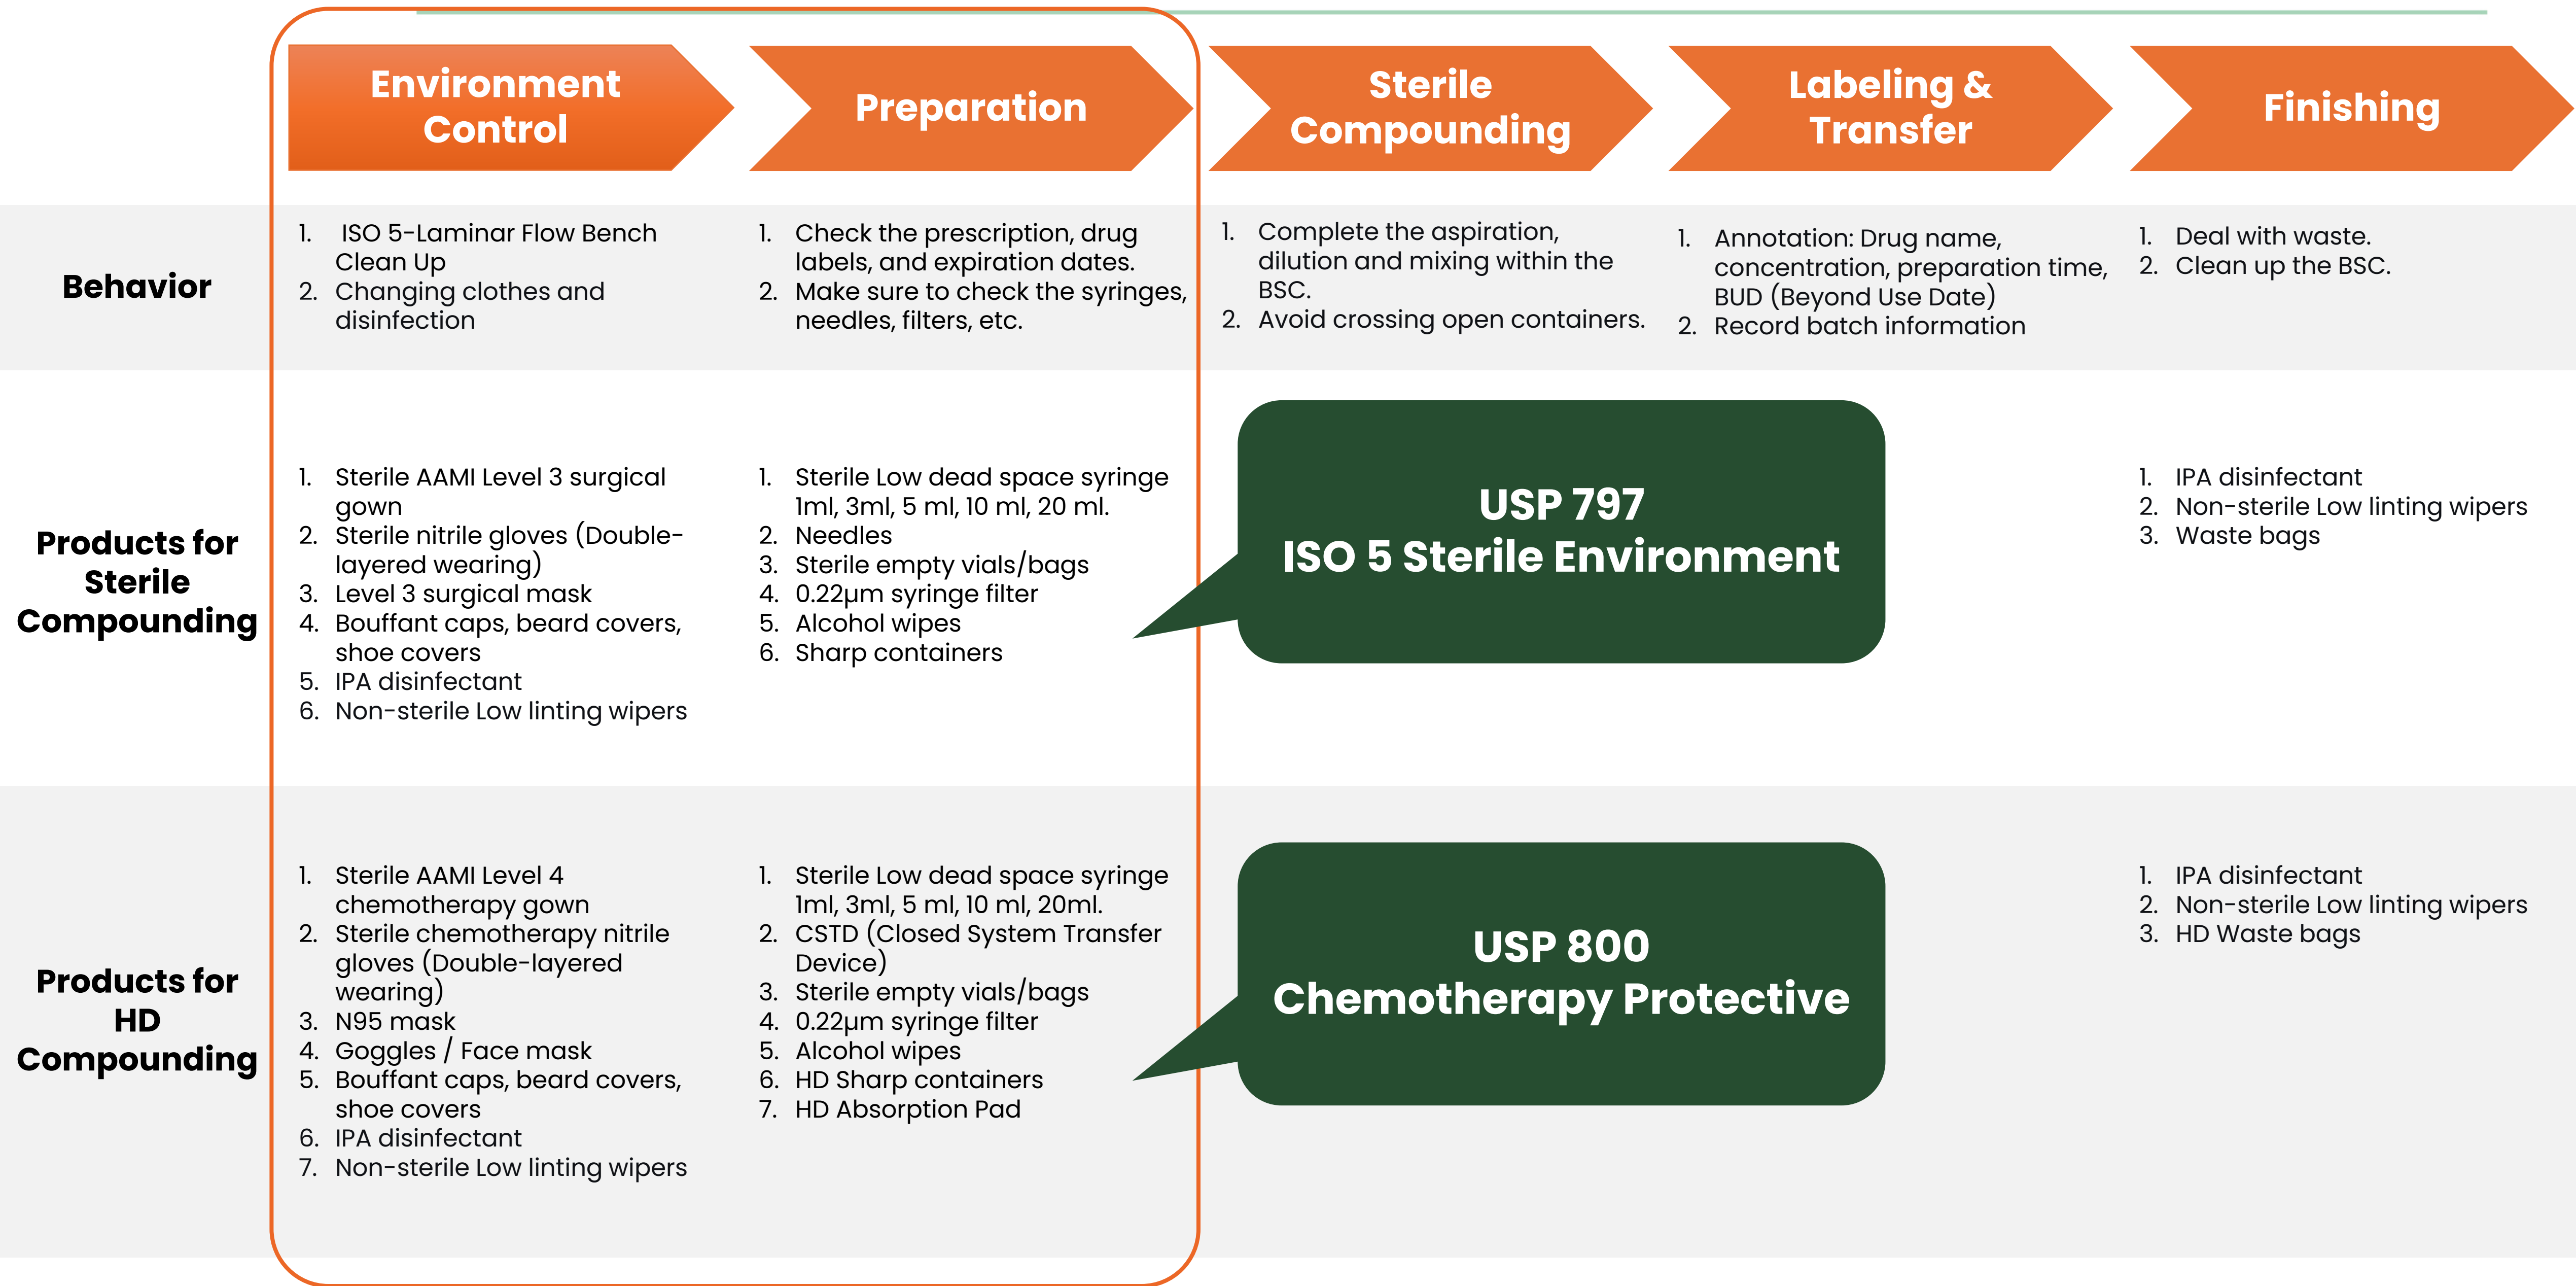

**Oral Formulations
(15%)**

1. Oral syringe(5-30ml)
2. Measuring cup / Measuring cylinder
3. Medicine dropper
4. Pill mold
