

PRODUCT REQUEST FORM

PRODUCT NAME:	Sterile Chemotherapy (Chemo) Gloves
DESCRIPTION OF REQUEST: - New Product - Modification - Product Extension - Country addition - Label Change - Intended Use -...Etc...	This initiative targets the critical and growing segment of hazardous drug (HD) compounding within the compounding pharmacy market. Project Background The enforcement of USP <800> has created a distinct and expanding market segment focused on operator and environmental safety during hazardous drug compounding. Within this framework, Sterile Chemotherapy Gloves are not merely an option but a required component of double-gloving protocols for HD handling. They are specifically tested against a suite of chemotherapy drugs for permeation resistance, offering a level of protection far beyond standard sterile nitrile gloves. Our channel analysis confirms that HD compounding represents a significant portion (~20%) of pharmacy activities, with specialized consumables commanding premium pricing. Developing or sourcing a new glove model to meet these rigorous ASTM D6978 standards would be a complex, multi-year endeavor. Therefore, the strategic and expedient path is to distribute an established, Branded Chemo Glove that is already validated and trusted by the market. This approach: • Provides immediate access to a compliant, high-margin niche with a clear regulatory driver. • Mitigates the technical and regulatory risk associated with introducing a new product in this highly sensitive safety category. • Completes our “Hazardous Drug Compounding Safety Suite”, allowing us to offer a coordinated solution alongside CSTDs (Closed System Transfer Devices) and Level 4 Chemo Gowns.  Compounding Pharmacy Market By Product, Till 2035 (USD Billion) Legend: Oral, Topical, Rectal, Nasal, Ophthalmic USD Billion USD 15.6 Billion Current Market Size 7% CAGR Till 2035 USD 31.8 Billion Value in 2035 Source: https://www.rootsanalysis.com/
PURPOSE OF REQUEST:	☐ Complaint No. _____ ☐ Supplier _____ ☒ New market _____ <u>US</u> ☐ Customer _____ ☐ Internal _____ ☐ Other _____ Add details:

Internal use only uncontrolled when printed, make sure it is the latest revision. Access to document control list to verify the latest version, If you do not have access to, or are unfamiliar with the document control list, you should consult your quality representative.

ESTIMATED BENEFITS:	☒ Financial Benefit: <u>Complete the product lines for the Compounding Pharmacy markets, Annual sales amount \$ 150M</u> (Mandatory For NPD request) <i>Estimate the potential increase in cash flows, revenues, or any other financial benefits</i> ☐ Cost Saving: _____ <i>Decrease in the cogs, transportation or operation expenses, or any other cost-saving opportunities</i> ☐ Improved Operational Efficiencies: _____ <i>Decrease in the Lead time, delivery time, MOQ, Inventory, or any other efficiency improvement</i> ☐ Non-Financial Benefits: _____ <i>Quality Improvement; Enhanced customer satisfaction, product competition, Brand reputation, etc.</i> ☐ Other Benefits: _____																
PRODUCT DESCRIPTION: - Functional performance requirements - Appearance - Any unique points of differentiation against similar competitor product lines - ..Etc...	Product Definition & Scope • Product: Sterile, powder-free nitrile chemotherapy examination gloves, certified to ASTM D6978 or equivalent standards for permeation resistance to specific hazardous drugs. • Primary Use: As the outer glove in a double-gloving system for personnel compounding or handling hazardous drugs, in full compliance with USP <800> requirements for personnel protection. • Partner Profile: A recognized manufacturer with specialized expertise in HD safety products, possessing comprehensive product validation data and a strong reputation within the oncology and compounding pharmacy sectors. 3.
