

PRODUCT REQUEST FORM

PRODUCT NAME:	Plastic Bottle with Metered Pump																																																				
DESCRIPTION OF REQUEST: - New Product - Modification - Product Extension - Country addition - Label Change - Intended Use -...Etc...	Plastic Bottle with Metered Pump, a critical delivery system designed specifically for sublingual immunotherapy (SLIT). This product is designed to capture a specific high-opportunity segment within the expanding allergy clinics market and strengthen our portfolio's competitiveness. Project Background The U.S. allergy immunotherapy market is experiencing robust growth, with a valuation of \$9.49 billion in 2024 and a projected CAGR of 7.5% to reach \$19.56 billion by 2034. A key driver of this growth is the increasing adoption of Sublingual Immunotherapy (SLIT), favored for its convenience and home-based administration. Within the consumables segment (valued at \$2.8-\$3.5 billion), precise and reliable allergen extract delivery is paramount for both treatment efficacy and patient safety. By establishing a "one-stop total solution" for Allergy Clinics Channel, we can engage more deeply across the entire allergy patient journey—from diagnosis (Skin Prick Tests, Blood Tests) to treatment (SLIT/SCIT) and ongoing management.
